The Championships will be contested over meetings as shown below each consisting of practice, timed qualifying, heats and final. Wherever possible 20 days' notice will be given but rule changes are effective immediately unless otherwise stated. The meetings will be as follows:

## 1.8. SCORING FOR CHAMPIONSHIPS

- 1.8.1. A driver must be entered into the Championship event in order to accrue points for the Championship. All Drivers for each participating group will have the opportunity to participate in two heats and a final (races) where they will be able to accrue championship points. Points will be awarded to competitors listed as classified finishers in the heats and finals as follows:

Position	Heat	Final
----------	------	-------

1 <sup>st</sup>	20	40
2 <sup>nd</sup>	18	36
3 <sup>rd</sup>	16	32
4 <sup>th</sup>	14	28
5 <sup>th</sup>	12	24
6 <sup>th</sup> ; onwards	-2 thereafter	-4 thereafter

In the case that grid sizes do not reach the maximum of 10 for any given group then the last position will be awarded points according to the series described above up to the actual grid size.

5 additional points will be awarded for the fastest lap time set during the final for each class. For the sake of clarity, this is independent of group.

The total championship points will therefore be the summation of the points accrued in all races and in addition the points awarded for the fastest lap time.

The finishing positions for any driver who fail to start a race will be appended after the classified race finishing positions. For clarity a non start is judged when the given driver fails to cross the timing line for the first time at the start of the race (as per regulation 2.5.3). In the case that more than one driver fails to start a given race, the appended classification will be ordered as per the order of the starting grid positions.

When more than one driver fails to complete the full race distance their finishing order will be determined by the laps completed with the driver who completes the most laps being placed the highest of the drivers who have failed to complete the full race distance. If more than one driver terminates their race on the same lap the finishing order will be appended to the final result first in line with laps completed as described here and then according to their starting grid position for the race in question.

Any driver who is excluded from a race will score 0 points in that race.

Any driver who is excluded from the event will score 0 points for that round.

The final Championship positions will be determined from the driver's total accrued points from each event. The competitor's best four events of a possible five will count towards the final Championship classification.

- 1.8.2. Drivers who have competed in all 6 rounds will drop their lowest round, this will include any fastest lap points accrued in that round.
- 1.8.3. Should a result for any position be tied from the total of the highest 5 Championship event scores, the result will be decided by the number of 1st places attained in race finals. If still undecided the tie will be resolved on the number of 2nd places in finals, then 3rd places and so on until resolved. If this still results in a tied Championship position, then the results of the heats as per the method described here will be used until resolved.
- 1.8.4. In the case of the races in a class not being completed for any reason the following will apply:
  - A. If a meeting is stopped as per [1.9.8.A](#) there will be no Championship points given in that class
  - B. If a meeting is stopped as per [1.9.8.B](#) a nominal points score will be given to all who qualify for that final of 30 points

## 1.9. SCORING FOR THE INDIVIDUAL MEETINGS

- 1.9.1. No points will be awarded to competitors for timed qualifying.
- 1.9.2. The results of the timed qualifying will be used to establish the grid positions for the first heats, the fastest time on pole position and so on.
- 1.9.3. If drivers have a tie on their qualifying times, then it will go to their next best qualifying time, the driver with the faster time will be gridded in front of the other driver.
- 1.9.4. The grid for the second heat will be determined by the points scored by each individual driver in the first heat.
- 1.9.5. Points for the heats are as defined in [1.8.1](#).
- 1.9.6. The combined points total from the heats will be used to establish the grid positions for the final, the highest total on pole position and so on.
- 1.9.7. If drivers are equal on their points from both of their heat results, then the fastest timed qualifying times will be used to determine their grid positions, fastest being in front.
- 1.9.8. In the case of a meeting not being completed for any reason the following will apply:
  - A. If a meeting is stopped prior to the completion of the Final of that class, there will be no points or awards given for the meeting. (see [1.8.4.A](#))
  - B. If a meeting is stopped after completion of Final the results of that class will be declared as per [1.8.4.B](#)
- 1.1.7. No Refunds for entries are given for any reason.
- 1.1.8. The series is not responsible for refunds for hotels, flights, and travel in the case of a meeting being cancelled.
