Category	Age range	Minimum driver weight (KG)
Bambino	6 years old to year of 8th birthday	19
Cadet	Year of 8th birthday to year of 12th birthday	23
Junior Light	Year of 12th birthday to end of year of 17th birthday	37
Junior	Year of 12th birthday to end of year of 17th birthday	50

- 6.2. Category weight is regarded as the driver complete with all race wear and PPE as used in the race or session to include, but not limited to; race suit, helmet, boots, and gloves, all of which should be in the issued condition.
- 6.3. If any driver moves from one category to another during the season, their points are not transferable to the new category.
- 6.4. The carrying of ballast on the driver’s person is prohibited.
- 6.5. Drivers who do not meet the requirements for their category may be permitted to enter in another category provided they are assessed by TKZ staff for safety.
- 6.6. Where possible, Junior and Junior Light drivers will be split into separate groups. However, if numbers do not allow for this, Junior-Light and Junior drivers will run together in a mixed grid and then upon qualifying, drivers will be split into groups by their fastest lap, irrespective of weight category.

7. 2023 TKZ SUMMER REGIONAL CHAMPIONSHIP SCORING

- 7.1. A driver must be registered for the Championship in order to accrue Championship points.
- 7.2. In the TKZ 2023 Summer Regional Championships, each driver’s best 5 results from the 6 available Rounds will count towards their Championship total.
- 7.3. All Drivers for each participating category will have the opportunity to participate in 1x Practice session, 1x Qualifying session, 1x Pre-Final and 1x Final. Championship points will be awarded from a driver’s finishing position in the Pre-Final and Final. Points will be awarded as follows:

PRE-FINAL	
Finishing Position	Championship Points
1st	34 points
2nd	31 points
3rd	29 points
4th	27 points
5 th onwards	-1 thereafter

FINAL	
Finishing Position	Championship Points
1st	54 points
2nd	51 points
3rd	49 points

4th	47 points
5 th onwards	-1 thereafter

- 7.4. Drivers in Group 2 will be scored consecutively from the last position in Group 1. For instance, where each group has 10 drivers, the 10th driver in group 1 will score points for 10th position, the 1st driver in group 2 will score points for 11th position, the 2nd driver in group 2 will score points for 12th position and so on.
- 7.5. 5 additional points will be awarded to the driver who attains the fastest lap time set during the A Final for each category. If there are 2 Finals (A and B) for a category, then 3 additional points will be awarded to the driver who attains the fastest lap in the B Final.
- 7.6. 5 additional points will be awarded to each driver that completes the STEM module for each specific Round in the designated time frame.
- 7.7. The total Championship points per round will therefore be the summation of the points accrued in both races (Pre-Final and Final) plus any points awarded for the fastest lap and the STEM modules.
- 7.8. If the driver who has set the fastest time in the Final is then disqualified from the Final or the Event, the points for fastest lap will go to the driver with the next fastest lap time in that Final.
- 7.9. The finishing positions for any driver who fails to start a race will be appended after the classified race finishing positions. For clarity, a non-start is judged when the given driver fails to cross the timing line for the first time at the start of the race. In the case that more than one driver fails to start a given race, the appended classification will be ordered as per the order of the starting grid positions.
- 7.10. When more than one driver fails to complete the full race distance their finishing order will be determined by the laps completed with the driver who completes the most laps being placed the highest of the drivers who have failed to complete the full race distance. If more than one driver terminates their race on the same lap the finishing order will be appended to the final result first in line with laps completed as described here and then according to their starting grid position for the race in question.
- 7.11. Any driver who is disqualified from a race will score zero points in that race.
- 7.12. Any driver who is disqualified from the Race Meeting will score zero points for that Round.
- 7.13. The final Regional Championship positions will be determined from the driver's total accrued points from each Round. The driver's best 5 Rounds of a possible 6 will count towards the final Championship classification. Drivers who have competed in all 6 Rounds will drop their lowest Round; this will include any fastest lap points accrued in that Round.

- 7.14. If a driver is disqualified from any Round, the disqualified Round may NOT be used as a dropped round.
- 7.15. Should a result for any position be tied from the total of the highest 5 Championship Round scores, the result will be decided by the number of 1st places attained in Finals. If still undecided, the tie will be resolved on the number of 2nd places in Finals, then 3rd places and so on until resolved. If this still results in a tied Championship position, then the results of the Pre-Finals as per the method described here will be used until resolved.
- 7.16. In the case of the races in a Category not being completed for any reason the following will apply:
- 7.17. If a meeting is stopped, any points accrued from the Pre-Final or Final will be scored providing that both groups in the given Category (where 2 groups are running) have run an equal number of Pre-Finals or Finals. For instance, Cadet Group 1 and Cadet Group 2 both completed both of their Pre-Finals.
- 7.18. If a meeting is stopped without both groups in the given Category (where 2 groups are running) having run an equal number of Pre-Finals or Finals, then drivers will be awarded points as per their previous session's finishing positions, with weighting as per the scoring system for Pre-Finals and Finals.

8. STEM MODULES

- 8.1. The TKZ Regional Championships incorporate an on-line STEM activity for the drivers to participate in. Each Round of the Regional Championships will be supplemented with on-line access to a STEM module, with access emailed out to all Championship registrants in the week prior to each Round, irrespective of whether the Registrant is booked into that specific Round.
- 8.2. These modules can be completed at home and whilst it's important that the drivers are actively involved in completing the modules, we anticipate that parents may also want to be involved during the process. This is perfectly acceptable, however we would urge the parents not to complete the modules themselves without active participation from the driver!
- 8.3. Deadline for completion of each module will be 7 days after each Round.
- 8.4. 5 Championship points will be awarded for successful completion of each module.
- 8.5. There is no 'drop round' system applied to the STEM points allocation, so all points for all 6 completed modules will go towards a driver's Championship points total.

9. SCORING FOR INDIVIDUAL RACE MEETINGS

- 9.1. No points will be awarded to competitors for Timed Qualifying. The results of the Timed Qualifying will be used to establish the groups for the Pre-Final and Final, in addition to setting the grid positions for the Pre-Final, with the fastest time on pole position and so on.
- 9.2. If drivers have a tie on their qualifying times, then it will go to their next best qualifying time, the driver with the faster time will take the grid position in front of the other driver.
- 9.3. Grid positions for the Final will be calculated from each driver's finishing position in their Pre-Final.

10. AWARDS

- 10.1. Trophies will be awarded to the top three finishers in the Finals of each Race Meeting.
- 10.2. The top 3 drivers in each category of the TKZ 2023 Summer Regional Championships will receive a Championship trophy.

- 10.4. Results will remain provisional until TKZ officials have confirmed them as the Final Results.
- 10.5. Competitors are obliged to collect their awards personally.
- 10.6. In the event of any provisional result or the Championship tables being revised after any provisional presentation, and if such revisions affect the distribution of any awards, the competitors concerned must return such awards to the TKZ Series in good condition within 7 days of request.

- 22.7. TKZ officials are not at liberty to delay the race start for drivers who have spun out on the formation lap.
- 22.8. The formation lap is not to be treated as a race to the grid, drivers are to keep in mind that they will be on cold tyres when exiting the pit lane and should look to gradually increase speed as they progress around the lap. No more than 75% speed should be achieved during this lap. Drivers are not to overtake competitors starting in a higher grid position than themselves unless in compliance with 22.6.
- 22.9. Weaving to promote tyre warming on a formation lap is prohibited.
- 22.10. Grid formation will be 2 by 2 where safe to do so, and the starting procedure will take the form of a standing start.

- 22.11. It is each driver's responsibility to start in the correct grid position. Competitors may signal to the Start Marshal if other drivers are preventing them from getting into their correct grid position.
- 22.12. Drivers who fail to take their correct position on the grid when instructed may be instructed to start from the last row of the grid.
- 22.13. Race starts will usually be conducted via the gantry start lights. Generally, the red lights will come on and when extinguished the race starts. Any amends to this process will be advised in the Drivers' Briefing.
- 22.14. If there are no start lights in operation a designated flag will be used. The flag will be raised above the Starter's head. Lowering of the flag designates the race start.
- 22.15. A Penalty will be issued to any driver who makes a jump start or false start. The Clerk of the Course's decision in this matter is final.
- 22.16. To be classified as a finisher, the kart must cross the start line at the start of the race under their own power.
- 22.17. After the race, drivers who feel that their kart has developed a problem must return it to the designated area within the pitlane and report the fault to a member of TKZ staff before leaving the pitlane. If a kart is placed back in line for the next race, then it is deemed fit for use in the next race.
- 22.18. During the Pre-Final and Final, drivers suffering a complete and permanent power unit failure that is not associated with any incident will receive points for their position on the timing system on the lap prior to the failure. If the failure occurs on the first lap, then the driver's starting position will be used to determine the number of points scored. No points will be awarded until the cause of the problem is verified by a member of TKZ staff.
- 22.19. During the Pre-Final, drivers suffering a complete and permanent power unit failure that is not associated with any incident will allocated a grid position in the Final equal to the position on the timing system on the lap prior to the failure plus 2 positions (i.e. 2 places back)
- 22.20. In the event of any damage or other mechanical failure caused by the driver, points will be awarded based on the driver's finishing position. Non-finishers will be awarded points for finishing last. If more than one driver fails to finish, then points will be awarded based on the number of laps completed (i.e. the driver completing fewest laps will be awarded points for last, etc.). If two drivers retire on the same lap, the points will be awarded based on the relative positions at the end of the lap prior to their retirements.

23. RED FLAG PROCEDURES DURING A RACE

- 23.1. In the event of a Red Flag, all drivers must slow to walking pace and stop as directed by the marshals.
- 23.2. The result will be declared as the order of finishing on the last full lap completed by all karts proceeding under their own power when the red flag was displayed, followed in classification by non-running karts on a roll back of laps basis and order of stopping.
- 23.3. If the result covers less than three quarters of the original full race distance and if there is enough time within the schedule, the race will be restarted.
- 23.4. Restarts will be in grid formation from a standing start with the starting order determined by the result of the first part of the race prior to the Red Flag.
- 23.5. The final race result will be taken from the result of the restarted race only, the first part of the race being used purely to determine the starting order for the restart.
- 23.6. If the result covers more than three quarters of the original full race distance, or there is not enough time within the schedule to accommodate a restart, then the result will be declared final.
- 23.7. If the race is restarted, the race time or number of laps will be determined by TKZ officials.
- 23.8. Any driver whose kart is damaged in the incident that caused the Red Flag and the driver or kart is subsequently deemed unfit to continue will not be allowed to take part in the restart of the race.
- 23.9. Drivers involved in the incident that caused the Red Flag incident may only take part in the restart if the kart is undamaged and Event Manager gives permission (subject to any penalties applied by the Clerk of the Course), and then only from the back of the grid. This will only be applicable if there is enough time in the schedule to accommodate this. Safety is of paramount importance, so if the Event Manager is in any doubt as to the fitness of the driver, they will not be allowed to restart.
- 23.10. No work may be carried out on any kart during a Red Flag stoppage.
- 23.11. No replacement karts will be given to any driver during a Red Flag stoppage under any circumstances.
- 23.12. Any penalty received in any part of the race will be applied to the final result.
- 23.13. Any drop nose cones will be recorded and re-set before the restart and any penalty applied after the finish of the race. Drivers are not allowed to reset their own nose cones.

- 24.2. Flag signals may be displayed on a digital display at the start line, or via circuit warning lights.

24.3. When the caution, chequered, black or mechanical flags are shown to a driver, he/she must show acknowledgement of the flag by briefly raising a hand if it is safe to do so.
